

Thank you for purchasing a Shakespeare antenna product. Customer comments are welcome. Before installing, please study the diagram and check parts supplied against those listed.

IMPORTANT! Please read all instructions before installing.

The Style 5237-XT is a Galaxy® Series, collinear-phased, ½-wave dual-band cellular marine antenna of 8' overall length. Style 5238-XT is the same, but with a black Galaxy® finish. The Style 5410-XT is a compact Galaxy® Series, collinear-phased, ½-wave dual-band cellular marine antenna of 4' overall length. Style 5411-XT is the same, but with a black Galaxy® finish. All are one-section antennas with stainless steel ferrules. The antennas have brass and copper radiators for extra high efficiency.

Tools required: Soldering iron (40-watt min., 75-watt max.), resin core solder, pocket knife, wire cutters.

Installation Instructions

Choose a mounting location that is as high as feasible, as free as possible from obstructions, and as far as possible from other antennas and strong sources of RF. The recommended mount is Shakespeare's Style 4187 stainless steel ratchet mount (sold separately). These antennas can be mounted self supporting.

Follow the directions included with the mount you choose. Route the cable to your cell phone, keeping it as far as possible from other electrical equipment and cables. Attach the TNC connector to the cable, according to the instructions packed with the connector.

To clean the antenna, use mild dishwashing liquid (one that is not harsh to the hands and without ammonia) in lukewarm water.

WARNING: Do not let paint solvents, cleaning solvents, or adhesive caulking come in contact with the antenna. Chemicals in these materials might destroy the finish.

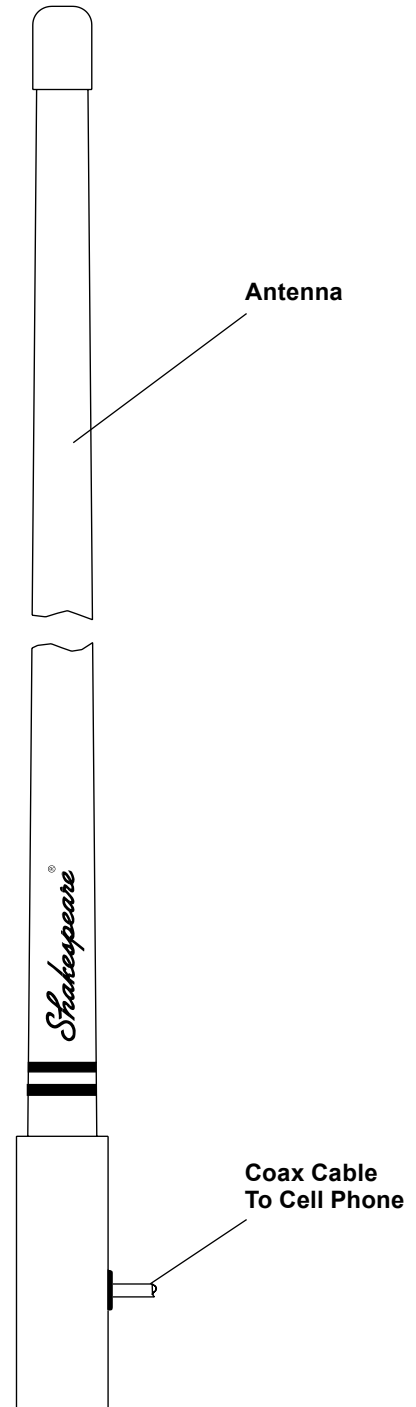

Tech Tips

This antenna will read "open circuit" when tested with an ohm meter or continuity tester.

The coaxial cable should remain at least 3 feet in length, measured from the point where the cable exits the antenna.

Supplied Parts

- 1 Antenna Assembly
- 1 TNC Connector with instructions
